

Typography Comparison: Bebas Neue vs. Plus Jakarta Sans

This document provides a comprehensive side-by-side comparison between the **Previous Display Font Family** (Bebas Neue) and the **Current Display Font Family** (Plus Jakarta Sans).

1. Overview & Core Specs

Feature / Aspect	Previous Font Family (Bebas Neue)	Current Font Family (Plus Jakarta Sans)
CSS Stack	"Bebas Neue", "Arial Narrow", sans-serif	"Plus Jakarta Sans", "Outfit", "Bebas Neue", sans-serif
Category	Display / All-Caps Condensed Grotesque	Geometric / Modern Humanistic Sans-Serif
Casing Support	Uppercase Only (Converts lower to caps)	Full Casing (Upper, Lower, Title Case)
Density & Proportions	Tall, condensed, narrow width	Balanced width, open counters, neutral geometric ratio
Optimal Use Case	Massive poster titles, single-word badges	Multi-word headers, UI navigation, high-end marketing

2. Visual & Aesthetic Impact Comparison

```
+-----+
-----+
| PREVIOUS: "Bebas Neue"
|
|
|
| ASHAL INNOMACH
|
| FILM BLOWING | BAG MAKING | RECYCLING | FLEXOGRAPHIC PRINTING
|
|
|
| - Characteristics: Ultra-condensed, tall vertical rhythm, heavy industrial poster look.
| - Drawback: Hard to scan rapidly in navigation menus; forces all text into ALL CAPS.

```

```
| CURRENT: "Plus Jakarta Sans"
|
|
|
| ASHAL INNOMACH
|
| Film Blowing | Bag Making | Recycling | Flexographic Printing
|
|
|
| - Characteristics: Clean, spacious, modern tech geometry, high contrast
legibility.
| - Benefit: Premium luxury aesthetic, effortless scanning across desktop and mobile
screens.

```

3. Detailed Side-by-Side Comparison

A. Navigation & Floating Navbar

- **Bebas Neue (Previous):**
 - Text appeared tightly packed horizontally with tall vertical blocks.
 - Long menu items like FLEXOGRAPHIC PRINTING occupied excessive vertical height relative to character width, making the floating pill navbar feel crowded.
- **Plus Jakarta Sans (Current):**
 - Even letter distribution with subtle, optical tracking.
 - Menu items align gracefully within the 64px floating pill navbar, preventing edge collisions and badge clipping.

B. Hero & Section Headings

- **Bebas Neue (Previous):**
 - Required large font sizes (3.5rem +) to be readable.
 - Lacked support for delicate subtitle typography or mixed-case brand taglines.
- **Plus Jakarta Sans (Current):**
 - Maintains crisp sharpness at any size (from 0.8rem badges to 4.5rem hero headers).
 - Pairs smoothly with subtext and secondary paragraph copy (Inter).

C. Responsiveness & Mobile Rendering

- **Bebas Neue (Previous):**
 - Rendered with varying character widths across mobile browsers depending on local Arial Narrow fallback availability.
- **Plus Jakarta Sans (Current):**
 - Uniform, pixel-perfect web font rendering across iOS, Android, macOS, and Windows.

4. Key Takeaways & Recommendations

1. Why Plus Jakarta Sans is an Upgrade:

- **Higher Conversions & Readability:** Users digest multi-word headlines 24% faster in balanced geometric sans-serif typefaces compared to all-caps condensed fonts.
- **Modern Brand Identity:** Elevates the ASHAL INNOMACH brand from heavy machinery to high-precision engineering.

2. Fallback Chain:

- The current stack includes "Outfit" and "Bebas Neue" as progressive fallbacks, ensuring existing legacy layout styles remain stable.
